## The Premier Tool for Managing Cost, Consumption and Carbon

The GES Dashboard, powered by EnergyPrint®, is an online energy management software designed by – and for – commercial property professionals who want to manage energy cost, consumption and carbon footprint across property portfolios. The tool’s powerful, yet easy-to-use, trio of benchmarking tools, data analytics, and unique services offers unparalleled benefits. Foremost, the GES Dashboard supplies the data managers need to identify opportunities to save.

### Main Features

- Energy Dashboard – Access complete data instantly in one central, easy-to-read visual display
- Energy Benchmarking – See entire property and portfolio performance and compare it to relevant benchmarks among peers
- Property Profile – Identify best and worst performers by analyzing energy data and patterns by building

- Energy Forecasting & Budgeting – Have the data to determine energy goals and prioritize improvements and plan for next year’s budget
- Weather Normalization – Compare a building’s energy use year-over-year regardless of temperature fluctuations or location
- ENERGY STAR® Integration – View your ratings from within EnergyPrint

UNITS	PREVIOUS 12 MO.	CURRENT 12 MO.	% CHANGE
Cost/sq. ft.	\$2.21	\$1.95	-13.1%
kBtu/sq. ft.	136	131	-5.2%
lbs CO <sub>2</sub> /sq. ft.	33.90	33.33	-3.7%
# of properties	12	11	

  

Property Name	COST	kBTU	CO2
4200	\$1.94	-17.5%	30,790
4210	\$1.31	-14.3%	10,585
Capitol Professional Building	\$2.29	-18.8%	34,320
Creekview Building	\$2.63	1.6%	16,111
DUPONT Center	\$2.04	-7.9%	61,842

## Technology-Driven, Yet Simple

The GES Dashboard is a Software as a Service (SaaS), web-based technology. It requires no additional software, hardware or in-house support. Users simply launch their web browser to view accurate, up-to-date metrics via an informational dashboard. The Greenwich Energy Solutions service team provides complete data management, making the tool a low-cost, administrative-free solution.

### Main Services

The GES Dashboard offers a menu of powerful services that, when accessed, make Greenwich Energy Solutions the superior energy partner in today's marketplace.

#### Historical Snapshot

We gather and input three years of historical utility cost and consumption data in order to provide immediate value. Having accurate historical data further strengthens the use of budgeting, weather normalization and comparison reporting.

#### Data Management

We gather and input customers' monthly utility data to ensure information stays current and accurate. Plus, we help monitor for anomalies and report across utilities for cost and consumption metrics.

#### Data Analysis

Our service extends beyond harnessing data. We help customers interpret their energy information and make it actionable. Ask about our analyst services.

#### Resources

On a daily basis, we stay current with emerging energy trends, looming compliance issues and more. We're eager to share our insight and prepare customers to meet complex regulations.
